

Call for donations for solar power supplies for ecovillages in Ukraine

Global Ecovillage Network of Ukraine (GEN Ukraine, registered in Ivano-Frankivsk region) needs donations for decentralized solar power supply. In Ukraine, there are daily power outages, and some villages are not connected to the electricity grid at all.

Each of the planned 60 stations, consisting of Photovoltaic solar modules, fittings, a power station with battery, cables, lamps and USB power supplies, costs around € 2,500. GEN Ukraine will procure the materials itself and its technical volunteers will build and maintain them. Donations will be used exclusively to purchase materials for solar systems and accessories. This will cover the first, greatest need for light, mobile phone charging and electricity for laptops and radio equipment. If more than €150,000 is donated, the project will be expanded to include larger, more powerful solar systems and solar-powered radio internet connections, so that communication in rural areas can be maintained. If the volume of donations is very high, then solar system combinations with split heating/cooling systems will also be procured to enable solar-supported heating.

Donations directly to GEN Ukraine NGO:

JSC CB „PrivatBank“

IBAN: UA883052990000026007035007331

SWIFT: PBANUA2X

Donations via Eine Welt Forum Aachen e.V.:

Bank: Pax-Bank eG

IBAN: DE63 37060193 1004126013

BIC: GENODED1PAX

Purpose: GEN Ukraine,
